

S.No.	Programs
1	Write a program to input two numbers and perform their addition
2	Write a program to input marks and calculate the grade of a student as per the DIAT norms.
3	Write a program to find largest among 3 numbers
4	Write a program to print following pattern: <pre> * ** *** **** </pre>
5	Write a program to print the Diamond Pattern <pre> * * * * * * * * * * * </pre>
6	Write a program to print the following pattern <pre> * ** *** ** * </pre>
7	Write a program to print the following pattern <pre> _ * _ *** _ ***** _ ***** </pre>
8	Write a program to print the following pattern <pre> ***** ***** </pre>

	*** *
9	Write a program to demonstrate the use of arithmetic operators and their precedence.
10	Write a program to demonstrate the use of logical operators
11	Write a program to demonstrate the use of relational operators
12	Write a program to demonstrate the use of main() function
13	Write a program to demonstrate the use of lamda fuctions
14	Write a program to add and multiply numbers using functions
15	Write a program to concatenate strings in Python
16	Write a program to demonstrate inbuilt functions
17	Write a program to demonstrate inbuilt Math functions
18	Write a program to calculate factorial of a number using recursion.
19	Write a program to make a List in Python and perform following operations on List: - length using len() function - print element at index 0 - adding an element to the list using + operator - appending an element to the list - negative indexing in list - remove the first occurrence of element a from list

	g) reverse the list h) sort list
20	Write a program to demonstrate use of Dictionary in Python with their inbuilt functions.
21	Write a program to demonstrate use of Set in Python with their inbuilt functions.
22	Write a program to demonstrate use of Tuple in Python with their inbuilt functions.
23	Write a program to calculate Median using List.
24	Write a program to calculate Mode using List.
25	Write a program to calculate Mean using List.
26	Write a program and create class Person, inherit Person class by Student.
27	Write a program to demonstrate the use of identity operators
28	Write a program to demonstrate the use of membership operators
29	Write a program to create module with functions and use this module in another program
30	Write a program to demonstrate list creation, append entire list to another list
31	Write a program to demonstrate slicing operations on the list

32	Write a program to generate a list using list generators
33	Write a program to perform split and join operation on a list
34	Write a program to find minimum, maximum in a list
35	Write a program to search an element in a list, find the number of occurrences and the index of its first occurrence
36	Write a program to create a 2D list
37	Write a program to iterate over a 2D list in different ways
